

Insights- Assignment 2

- We can clearly see the trend that seems like a sigmoid graph.
- There is low linear growth seen from day 10 to 35.
- The trend clearly shows growth in an exponential manner from day 35 up until day 70.
- After 70 there is again a linear growth till the end.
- From the above graph we can clearly conclude that the government needs to take concrete measure for restriction as early as possible, further delay would put a tremendous amount of pressure onto the hospital systems.
